

Know what's going on at your property, even when you're not there

Hoteliers have a lot to keep track of, and you can't always be on-site to know what's going on at your property. That's why Hospitality WiFi offers a variety of CCTV packages to help keep an eye on your property even when you're not there. The security feed behind your front desk lets your guests, your staff, and any troublemakers know that your hotel is using security cameras with the latest technology to monitor lobbies, hallways, pools, and other common areas for deterrence and peace of mind.

Our commercial-grade high-definition CCTV equipment can help you improve the safety and security of your property:

- View your property remotely 24/7 via PC, smartphone, or tablet at no extra fee, using our mobile app or PC-based software
- Monitor your property day and night with IR cameras
- Upgrade to digital recording – we offer analog (DVR) and IP (NVR) options from 3MP up to 4K resolution
- Record audio as well as video for front desk security and loss reduction
- Choose recording capability from 16CH up to 128CH to fit the needs of your property
- Gain protection from theft, fraud litigation/claims, vandalism, employee issues, etc.

Get a better view of what's going on at your property – contact us today
